A SERIES OF 12 TEAM PRACTICES

Team Accelerator consists of 12 individual team practices. These practices are designed to be flexible and to meet the needs of the team right now. They do not have to be done in specific order. Some don't even need to be done at all.

It really is that flexible.

Each step is designed to meet the unique challenges of your team, transform the team dynamic and impact organizational outcomes. We've spent decades developing and refining these practices with distinguished leadership teams around the world. They have been informed by rigorous research and data so that when teams deploy them, change is immediate. In short, these practices build effective leadership teams quickly and sustainably.
